Reservoir Engineering Manager Job Description

Olympus Energy is seeking a Manager of Reservoir Engineering for its Pittsburgh area office. This position will work with the internal planning, engineering, and subsurface groups to assist in reserves preparation/evaluation, field development planning/optimization, data management, and engineering analyses. This position will report to the Chief Operating Officer.

Required Qualifications:

- Bachelor's degree in Chemical/Petroleum Engineering or related discipline
- 5 years of experience with an E&P company, engineering consulting firm or investment bank, with strong background in reservoir engineering and economic analysis
- Familiarity with subsurface geology and operations
- Proficiency in Microsoft Office (Excel, PowerPoint, Access), ARIES, and Spotfire (or other data analytical software packages)
- Commitment to core Olympus values of: Integrity & Trust, Excellence, and Stewardship

Desired Experience/Skills:

- Ability to evaluate M&A and A&D transaction opportunities
- Strong written and verbal communications skills
- Ability to establish and maintain professional relationships and expand knowledge base
- Highly motivated and collaborative team player
- Strong work ethic and attention to detail

Olympus Energy is committed to creating an inclusive and diverse environment and is proud to be an equal opportunity employer. All qualified applicants will receive consideration for employment without regard to race, color, gender, gender identity or expression, sexual orientation, religion, national origin, genetics, disability, age, or veteran status.

Interested candidates may submit resumes via email to careers@olymusenergy.com. Please visit Olympus's website at http://www.olympusenergy.com for more information.
